Romania

APPLICATION:

Gas Compression

ENGINE/COMPRESSOR:

Ajax DPC-2804-2 3-stage

ALTRONIC PRODUCTS:

EXACTA21 Safety Control Panel with MIDAS HMI Color Touch Screen

OVERVIEW:

The Exacta was the best and only fit for the new panel installations at RomGaz in Romania.

When asked by Altronic Controls General Manager, Neil Moynihan, to comment on the new panel, a representative of the customer, John A. Ward, readily offered the following, "Praise is something that does not seem to be communicated often enough, but I would like to take this time to tell you what a great job you and your group has done specifying the control panel for the RomGaz units. It is so user friendly and extremely easy to operate even a child could use it. Trouble shooting was a breeze during our first test run of CT# 11019. The field techs are able to see exactly what the unit is doing in real time, and control of any end device should be a breeze. Kudos to you, your group, and Altronic for a great product that should make everyone's job much easier.

Panel insert front view – all you see is the MIDAS HMI touch screen

Panel insert back view – EXACTA21 keypad acting as a "hot back up" to the MIDAS

I encourage anyone who hasn't seen this panel operating to take some time during one of our subsequent test runs to come to the floor and see for themselves."
